

How much can you save?

Hiring the crusher costs **£150 per day or £600 per week** (*excluding VAT, delivery and collection*).

Compare this with using a skip to dispose of rubble that has not been crushed and cannot be re-used:

Example: 10 Tonnes of Waste Crushed on-site using the Micro Concrete Crusher:

Without a crusher: 10 Tonne of waste material – 2 no. 6yd skips required - 2 x £130.00	£260.00
Without a crusher: 10 Tonne of Crushed Material bought in at £12.50/Tonne	£125.00
	£385.00 SPENT
With a crusher: On-Site Compact Rubble Crusher Hire - 1day	£150.00
(In excess of 24 Tonnes per day has been achieved)	
	£235.00 SAVED
<i>Don't forget to add into the savings the Labour cost of not barrowing the waste to skip and then barrowing in the crush base material back in!</i>	
Imagine the savings on the 24 Tonne you could crush in one day!!	all plus VAT
